Periodic Classification of Elements: MCQs for NEET exam ...
The main environmental feature is the ozone depletion potential. The replacement of materials with noxious properties such as ammonia (toxic) and ethylene (flammable) with non-toxic, non-flammable CFCs has been arrested by the environmental harm which the latter cause. The production and use of CFCs is restricted by the Montreal Protocols.

Introduction. The National Science Board (2003) sounded an alarm about critical workforce shortages in jobs that require high-level mathematical and science skills. Their fears about a dwindling pool of mathematicians and scientists has fueled concern that the United States will not be able to maintain its leadership in science and technology, which translates directly to an inability to fill ...
