Basic Training on TCAD Sentaurus Tools Overview SENTAURUS WORKBENCH: The class covers the basics of this framework tool that allows organization of parameterized TCAD simulations in a single project with many possible splits, or branches.

TCAD Sentaurus Tutorial
Sentaurus Workbench is a complete graphical environment for creating, managing, executing and analyzing TCAD simulations. Its intuitive graphical user interface allows users to efficiently navigate and automate the typical tasks associated with running TCAD simulations such as managing the information flow, including preprocessing of user input files, parameterizing projects, setting up and ...

Sentaurus device Demo VNIT IEP 2016
Sentaurus Workbench is the primary graphical front end that integrates TCAD Sentaurus simulation tools into one environment. It is used throughout the semiconductor industry to design, organize, and run simulations. Simulations are organized comprehensively into projects. Sentaurus Workbench automatically manages the information flow, which ...
