In daily life, partial schedules of reinforcement occur much more frequently than do continuous ones. For example, imagine if you received a reward every time you showed up to work on time. Over time, instead of the reward being a positive reinforcement, the denial of the reward could be regarded as negative reinforcement.

Section 1 1. Student's descriptions can vary. Theoretically, the first pendulum falls quickly. It begins to slow down just after it passes the lowest point in the swing and enters the upward part of the swing. When the first pendulum hits the second pendulum, the first pendulum slows further and the second pendulum starts to swing. The two
