How to Test and Replace PCV Valve on your Vehicle

The Ford Expedition is known for idling roughly, with a slight whistling noise from the engine compartment. After a short time, this may result in poor fuel mileage, and illumination of the check engine light.. This is caused by a cracked positive crankcase ventilation (PCV) valve hose, which allows a small vacuum leak, and improper evacuation of engine crankcase pressure.

2004 ford f-150 4.6l v-8. Where is PCV valve located ...

If you need help finding this hose, it T's into the same hose that goes to your PCV valve on the valve cover. Trace that hose toward the passenger's side of the truck and it should go underneath your main electrical relay on the firewall and snake around your evaporator and then go back behind your battery.
