Wheel Balancers | Hunter Engineering Company

The balancer must be located on a flat floor of solid construction, preferably concrete. The balancer must sit solidly on its three feet. If the balancer is not level, does not sit solidly on its three feet, or is placed on an unstable floor, the balancer will not function properly and will produce inaccurate balance readings.

Fmc Tire Balancer Repair Manual - WordPress.com

This manual assumes you are already familiar with the basics of tire balancing. When reading the instructions in this manual, the "Action Items" provide the basic information needed to operate the balancer. The "italic" references are used to refer to other parts of this manual for more detailed information specifically referred to by name.
