Instructor's Manual - USP  
International economics is concerned with the effects upon economic activity from international differences in productive resources and consumer preferences and the international institutions that affect them. It seeks to explain the patterns and consequences of transactions and interactions between the inhabitants of different countries, including trade, investment and transaction.

Theories of International Relations  
Gottfried von Haberler (German: [ˈhaʁtʃbɛrlɪ]; July 20, 1900 – May 6, 1995) was an Austrian-American economist. He worked in particular on international trade. One of his major contributions was reformulating the Ricardian idea of comparative advantage in a neoclassical framework, abandoning the labor theory of value for an opportunity cost concept. ...
