I've had my 9N for 15 years and consider it to be in great shape for a 64 year old tractor. I started using non-detergent, but ran out of a source for it. I then switched to a 15W-40 low detergent oil that I bought from a local Ford tractor dealer. He noted that most owners use straight weight or multi-weight detergent oil.

[Yesterday's Tractors - What Oil Should I Use?](#)

The Ford N-series tractors were a line of farm tractors produced by Ford between 1939 and 1952, spanning the 9N, 2N, and 8N models.. The 9N was the first American-made production-model tractor to incorporate Harry Ferguson's three-point hitch system, a design still used on most modern tractors today. It was released in October 1939. The 2N, introduced in 1942, was the 9N with some improved ...

9n Ford Ferguson Engine Oil File Type

The Ford Ferguson 9N and 2N were also available with a similar engine. The Z129D engine Continental developed was a diesel version of the Z129 engine used on the TO-30 but, I believe the Z129D had a fuel injection system like conventional diesel engines.

9n Ford Ferguson Engine Oil File Type

Rebuilding the engine so it again has the proper bearing clearances and pump gear clearances is the only true fix. We also hear about newly rebuilt engines that have low oil pressure. A proper rebuild of the engine and pump will result in a running oil pressure of 40-45 PSI cold and at least 35-40 PSI hot.

Ford 9n - Steiner Tractor Parts

The TO-20 uses a Continental Z-120 motor. Ford produced their own engine for the 9N. The carburetors are different, too: The TO-20 uses a Zenith, and the 9N has a Marvel carburetor. Some people call the Ford 9N tractors a "Ford-Ferguson" tractor. While I know what they're talking about, this technically isn't the name of any model of ...

9n Ford Ferguson Engine Oil

The Ford 9N is equipped with a 2.0 L four-cylinder gasoline engine and sliding gear transmission with 3 forward and 1 reverse gear. The Ford 9N utility tractor used the Ford engine. It is a 2.0 L, 1,961 cm³ (120.0 cu-in) side-valve, four-cylinder, natural aspirated gasoline engine with 81.0 mm (3.19 in) of the cylinder bore and 95.0 mm (3.74 in) of the piston stroke.

Read Book 9n Ford Ferguson Engine Oil

Low Oil Pressure - Ford Fordson Collectors Association

Your gas engine has a compression ratio of anywhere from 5:1 to 8:1 while a diesel engine runs from 13:1 up to 18:1 and so needs to use only a premium oil to protect it better. The diesel service oil also needs to be higher detergent in order to suspend the carbon particles inherent to their operation.
