Animal- and human-centering. -- This theory starts with the human being rather than any lower and presumably 'simpler' animal. Too many of the findings that have been made in animals have been proven to be true for animals but not for the human being. There is no reason whatsoever why we should start with animals in order to study human motivation.

After listing the propositions that must be considered as basic, the author formulates a theory of human motivation in line with these propositions and with the known facts derived from observation and experiment. There are 5 sets of goals (basic needs) which are related to each other and are arranged in a hierarchy of prepotency. When the most prepotent goal is realized, the next higher need ...

**Maslow's hierarchy of needs - Wikipedia**  
Maslow's hierarchy of needs is a motivational theory in psychology comprising a five-tier model of human needs, often depicted as hierarchical levels within a pyramid. When one need is fulfilled a person seeks to fulfill the next one, and so on. Every person is capable and has the desire to move up the hierarchy toward a level of self-actualization. Unfortunately, progress is often disrupted ...
