The AAFP produced the first set of vaccination guidelines in 1998. They were updated in 2000 and again in 2006. Each version has offered a comprehensive review of the literature and has provided recommendations for vaccine protocols based on known science, along with some extrapolation between studies and between species when feline studies were not available.

reviews recent scientific literature and outlines feline vaccination recommendations suitable for most cats. It must be emphasized that the report is not intended to represent a general protocol for vaccination of all cats; instead, it is intended to guide the development and implementation of safe and effective vaccination protocols.
