Abstract: Ricci flow is a powerful curvature flow method, which is invariant to rigid motion, scaling, isometric, and conformal deformations. We present the first application of surface Ricci flow in computer vision. Previous methods based on conformal geometry, which only handle 3D shapes with simple topology, are subsumed by the Ricci flow-based method, which handles surfaces with arbitrary ...

For the numerical calculations the commercial 3D-numerical software FLOW-3D v.9.4.2 (Flow Science, 2010) is used. The grid is build up with six rectangular blocks, which reach up to nearly 4 million cells (50% active cells, Fig.2 left). The minimum grid size is 0.125 m in each direction and the whole model covers an area of 70 m by 150 m.
