Evens skin tone: It inhibits tyrosinase, which is an enzyme that leads to pigmentation. It's effective on post-inflammatory hyperpigmentation from acne breakouts and can possibly have an effect on melasma as well. Treats rosacea: Azelaic acid could help with pore-clogging, inflammation, and secondary infections caused by rosacea. "It's a less irritating option, which is why we use it for rosacea because the skin tends to be very sensitive," Gerstner says.

Rosacea: The Complete Guide To Causes And Flare-Ups

Rosacea is a common skin condition that affects between 0.5 percent to 10 percent of the population. It commonly develops during teenage years or someone's 20s and then can become worse into the 30s or 40s. The cause of rosacea is still not entirely understood, though there are many contributing factors.
