Adding or Subtracting Rational Expressions . Step 1. If the denominators are the same, add or subtract the numerators.Place the result over the common denominator. If the denominators are different, first find the least common denominator.Write all rational expressions with this least common denominator, and then add or subtract the numerators.

Adding and subtracting rational expressions is identical to adding and subtracting with integers. Recall that when adding with a common denominator we add the numerators and keep the denominator. This is the same process used with rational expressions. Remember to reduce, if possible, your ?nal answer. Example 1.
