Programming frequencies in the Yaesu FT-2DR/DE - Net Magellan
I love the FT2D but learning to program this thing was an exercise in frustration. I found the SCU-18 cable actually worked best for programming channels and memories from the software to the radio and vise-versa. And you have to go in and make sure the sw is set on the right com port and sees the cable. Anyway that was not too bad.

How to Program the FT3D or FT2D with ADMS on a Computer

The FT2D cannot read a comma-separated-variable (CSV) file directly, so you need programming software to output the information to BACKUP.DAT; then you import it to the radio. I took the precaution to read discussions of this procedure and most people seemed to agree that the free program ADMS-8 on Yaesu's website is "no good".

These are examples you can use when programming your FT-991(A), FTM-400XD, or FT2D. Please note: The VHF and UHF channels in these example files are configured according to the UK band plan. Channel spacing and deviation may be different in your country. Please see the tips page for details on repeater-shift and the quirks of the ADMS software.
