*As a history buff, I picked this up a couple days ago, even though the European Renaissance isn't usually my preferred era to read up on. I wasn't disappointed by the history, but I was wonderfully surprised by the comparative account the book gives of the present day, of medical and scientific advances, technological leaps forward, and new ways of thinking.*

*The back-staff was invented by John Davis in 1590 and it allowed the navigator to stand back from the sun and work with the shadows. It was a great invention for one of the problems with the cross-staff was that you have to look at the sun and this led to blindness and damage to the navigator's eyes but, the back-staff worked with the shadows of the sun which helped obtain altitude.*

**NAVIGATION. Besides new maps, the Chinese created the compass and the Greeks invented the astrolabe. The compass showed the direction the ship is going and the astrolabe shows the ships north-south position based on the constellations. This allows sailors to sail far and wide without basing their navigation on land.**

**The Portuguese began systematically exploring the Atlantic coast of Africa from 1418, under the sponsorship of Infante Dom Henrique (Prince Henry). Under the direction of Henry the Navigator, the Portuguese developed a new, much lighter ship, the caravel, which could sail farther and faster, and, above all, was highly manoeuvrable and could sail much nearer the wind, or into the wind.**
