Intercropping and agroforestry in China - Current state ...

In the western British Isles, pastoral agriculture with sheep and cattle is the dominant land use. Current changes in EU policy, specifically the implementation of farm decoupling through the Single Farm Payment, enforcing the Nitrates Directive, environmental cross-compliance measures and other initiatives within the Rural Development Plan have driven the need to find alternative land use systems which can enhance biodiversity on grassland farms.

A chestnut orchard is an open stand of grafted chestnut (*selva castanile*) trees for fruit production. In this agroforestry system, trees are usually intercropped with cereals, hay or pasture. These orchards are traditional systems in Canton of Ticino (Switzerland) and Northern Italy, where they are called "selva castanile". Similar systems can also be found in the Mediterranean region, for ...
