Southeast Alaska has an unusual climate that allows a large number of edible plant and edible mushroom species to grow. The area consists primarily of the Tongass National Forest, which is a Temperate rainforest. This rainforest has plenty of precipitation and the temperature remains relatively constant, therefore many plant and fungi species flourish there.

Avoid all white berries in Alaska—they're all poisonous. And the most infamous poisonous berry in Alaska is the baneberry, which has white or red berries—look for a black spot on the red berry. The bright side: because they taste so bitter, people often spit out baneberries before swallowing, mitigating their potentially deadly effects (they can cause cardiac arrest.)
