Being part of the subject of algebraic topology, this post assumes the reader has read our previous primers on both topology and group theory. As a warning to the reader, it is more advanced than most of the math presented on this blog, and it is woefully incomplete. Nevertheless, the aim is to provide a...

The Fundamental Group — A Primer – Math ? Programming  
In algebraic terms, this would correspond to a quotient space (really, a quotient group, which we covered in our first primer on groups) of the k-cycles by the k-boundaries. That is, a cycle would be considered a "trivial hole" if it is a boundary, and two "different" cycles would be considered the same hole if their difference is a k-boundary.
