Chap. 0, Problem 4.

Figure 1: A connected space which is not path connected. Since $(U_1 \cap U_2) \cap X = \emptyset$ we deduce that $S \cap U_1 = \emptyset$. Consider now the sequence of points on the horizontal axis $p_n = (1/n, 0)$. These points lie on the “snake” S , and converge to $(0,0) \in V$.
