The Online Books Page: Maintained by the University of Pennsylvania, this page lists over one million free books available for download in dozens of different formats.

GE Wind Energy – Wikipedia

High-speed rail (HSR) in China consists of a network of passenger-dedicated railways designed for speeds of 250–350 km/h (155–217 mph). It is the world's longest high speed railway network and also the most extensively used. China's HSR accounts for two-thirds of the world's total high speed railway networks. In 2019, China started testing a magnetic levitation ("maglev") prototype ...

France derives over 75% of its electricity from nuclear energy. This is due to a long-standing policy based on energy security. France is the world's largest net exporter of electricity due to its low cost of generation, and gains over EUR 3 billion per year from this. France has been very active in developing nuclear technology. French Reactors and fuel products and services are a major ...
