## **Spoon theory - Wikipedia**

Internet addiction appears to be a common disorder that merits inclusion in DSM-V. Conceptually, the diagnosis is a compulsive-impulsive spectrum disorder that involves online and/or offline computer usage (1, 2) and consists of at least three subtypes: excessive gaming, sexual preoccupations, and e-mail/text messaging .All of the variants share the following four components:  
1) excessive use ...

## **Online Courses : Fleming College**

Spoon theory is a metaphor that is used to describe the amount of mental or physical energy a person has available for daily activities and tasks. The theory was developed by Christine Miserandino as a way to express how it felt to have lupus. She used spoons to provide a visual representation of units of energy that a person might have and how chronic illness forces her to plan out her days ...
