houses of worship, or other small to mid-sized venues, it's the gear that breaks performance wide open.

DIY Wireless Microphone RF Distribution

Turn on and set up each receiver/transmitter pair individually to prevent cross-linking. Turn on the first receiver. Press and hold the group button to select a group (if necessary) or if the group is already set, press the channel button to scan for the best available channel. Turn on the first transmitter.

UA844+ - Antenna Distribution System

UA874 uses a log periodic dipole array to produce a cardioid pattern towards the desired coverage area with greater rejection of RF signals outside the coverage area when compared to standard $\frac{1}{2}$ wave omnidirectional antennas. An integrated amplifier with four gain settings compensate for varying degrees of coaxial cable signal loss.

Remote Antennas for UHF-R, BLX4R, SLX, ULX, QLX-D ... - Shure

It seems like there's never as much time as you'd like to do sound check. That's why UA844+SWB Antenna Distribution System lets you stretch the power of your antenna pairs, giving you more on-air channels in less setup time. So you can set it, forget it, and have more flexibility to make sure it all sounds perfect.

UA8 - $\frac{1}{2}$ Wave Dipole Antenna - shure.com

The Shure ULXD4 is a half-rack, networkable wireless receiver for use with ULX-D® Digital Wireless Systems. With an expansive set of professional features, including 24-bit / 48 kHz digital audio quality, efficient and intelligent RF performance, and AES 256-bit encryption, ULX Digital offers uncompromising wireless tailored for professional sound reinforcement.
