AP Statistics: Chapter 8 Test by Sunny Grae on Prezi

One frequently used test is the DRP, or Degree of Reading Power. A researcher suspects that the mean score μ of all third- graders in Henrico County Schools is different from the national mean, which is 32. To test her suspicion, she administers the DRP to an SRS of 44 Henrico County third-grade students.

Test 8b ap statistics. Since the school population is 60% girls and 40% boys, with a stratified random sample, we could ensure that the sample matches those percentages. So we would want.6 (30) = 18 girls and.4 (30) = 12 boys in our sample. We would then number the girls 001-300 and select an SRS of 18 using the RDT.

PTS: 1 REF: Test 8A 13. ANS: C /C/Correct! Plot Z is a small sample, but the distribution of sample data is symmetric and has no outliers. It should be safe to use the t-procedure in this case. Plot X has an outlier, and the sample size in Plot Y is too small to compensate for the strong skew in the data. PTS: 1 REF: Test 8B
