The new API 541 5 th Edition motor standards will require several significant changes in the manufacturing of motors used in oil and gas applications. Because Baldor engineers participate in the working groups that help establish those standards, we've already begun updating our complete line of API 541 motors to meet them.

American Petroleum Institute has adopted two rigorous standards for motor performance —API 541 for critical service motors, and API 547 for severe-duty general purpose motors. For more than 20 years, Siemens motors, built in Norwood, Ohio, have been the API-standard motors of choice in hundreds of process facilities around the globe.
