seed, you have to be aware of some facts.

First of all, apple trees grown from seeds (and will not get grafted in the future) will most likely not produce fruits for the first 7-10 years of their life. Some of them may not produce fruits for the whole of their lifetime.

The best exposure for apples is a north- or east-facing slope.

Tree spacing is influenced by the rootstock, soil fertility, and pruning. Seedlings or full-size trees should be planted about 15 to 18 feet apart in a row. A dwarfing rootstock might be 4 to 8 feet
