The Operational Auditing Handbook: Auditing Business and ...

Process Auditing What is a process audit? A process audit is an examination of results to determine whether the activities, resources and behaviours that cause them are being managed efficiently and effectively. A process audit is not simply following a trail through a department from input to output - this is a transaction audit. Processes generate results therefore for an audit to be a process audit it has to establish whether the results are being generated by an effectively managed process.

Business process audit: Definition, benefits and objectives

One of the objectives of the audit process is to verify that all company processes are aligned with this strategic vision and that they deliver the value that internal customers need and external ones want. You could say this is the central objective of the audit process, but it's necessary to list others:
