Linux Tutorial - Learn the Bash Command Line

There may be times where you need or want to boot up a Linux system without using a GUI, is with no X, but rather opt for the command line. Whatever the reason, fortunately, booting straight into the Linux command-line is very simple. It requires a simple change to the boot parameter after the other kernel options.

Beginning the Linux Command Line: Sander van Vugt ...

Studying the Linux command line provides an education in much more than just how to use a specific operating system. One reason is that the Linux command line is virtually identical to the command line used on every other Unix-like operating system, e.g., Solaris, FreeBSD and Mac OS X. Thus, multiple operating systems are being learned simultaneously.
