A bacteriophage (/ b æ k t i r i o f e d /), also known informally as a phage (/ f e d /), is a virus that infects and replicates within bacteria and archaea. The term was derived from "bacteria" and the Greek (phagein), meaning "to devour". Bacteriophages are composed of proteins that encapsulate a DNA or RNA genome, and may have structures that are either ...

Bacteriophage - Wikipedia  
Etymology. The word fox comes from Old English, which derived from Proto-Germanic \*fuhsaz. This in turn derives from Proto-Indo-European \*pu -, meaning " thick-haired; tall ". Male foxes are known as dogs, tods or reynards, females as vixens, and young as cubs, pups, or kits, though the latter name is not to be confused with a distinct species called kit foxes.
