students the use of the BOLTS process for mapping conventions (as in unit 1) as well as using a legend to identify the zones.

Updated World Map of the Koppen-Geiger Climate Classification

Climatic Zones of the World. Temperature range increases with distance from the equator. Also, temperatures decrease as you move away from the equator. This is because the sun's rays are dispersed over a larger area of land as you move away from the equator. This is due to the curved surface of the earth.

Climatic Zones of the World

Where To Download Blank Map Of Climate Zones For Children

Map of the Week - World Climate Zones Having just spent some time in a (thankfully) different climate zone, I've been interested in world climate zone maps. In geography class we all studied the Koppen Climate Classification. This map is fairly well done and has a nice legend that explains the complicated classifications well.

*These lessons can be found at : <http://www ...>
Climate zones. Latitude — the distance north or south of the equator — influences whether a climate is cold or hot. The midlatitude Prairies experience continental extremes: cold winters and hot, dry summers. The high-latitude Arctic endures intensely dry and frigid conditions. The largest zone by far is the Subarctic, which knows short,...*
