QTR 02 14 - Boeing
Boeing 787-9 Dreamliner. Boeing 787-9, also known as the Dreamliner, is a wide-body aircraft with great range flexibility and twin-engines. The high proportion of composites used during manufacture creates a high humid environment that ensures a comfortable journey.

Boeing South Carolina - Wikipedia
Poor, poor product on the 787. Flew the first part of my journey on the a380 with etihad and was far superior to the 787. Seat was too narrow, leg room was non existant and could not recline my seat due to passeger behind being of normal human size. Claims that the 787 are quieter than other aircraft seem to be false.

Boeing: Airport Compatibility
Airplane Characteristics for Airport Planning. These documents provide, in an industry-standardized format, airplane characteristics data for general airport planning. Sections within each document include: airplane description, airplane performance, ground maneuvering, terminal servicing, operating conditions, and pavement data.

SeatGuru Seat Map Saudia
