Boost.Asio is a C++ library used for network programming operations.

Organizations use Boost because of its productivity. Use of these high-quality libraries speed up initial development, result in fewer bugs, reduce reinvention-of-the-wheel, and cut long-term maintenance costs.

## Boost.Asio - 1.69.0

What you want is an easy level of abstraction, which is just what this book provides in conjunction with Boost.Asio. Switching to Boost.Asio is just a few extra `#include` directives away, with the help of this practical and engaging guide. This book is great for developers that need to do network programming, who don't want to delve into the complicated issues of a raw networking API.

Programming, 2nd Edition –  
forcoder.su

This article by Dmytro Radchuk, the author of the book Boost.Asio C++ Network Programming Cookbook, discusses about the following topics: Connecting a socket; Using fixed length I/O buffers (For more resources related to this topic, see here.).

Connecting a socket. Before a TCP socket can be used to communicate with remote application, it must establish a logical connection with it.
