Bosch Leak detection pumps ensure the evaporative emission system (EVAP) is functioning correctly. Leak detection pumps provide pressure so the system can be checked for leaks while other EVAP system valves are closed. A faulty leak detection pump will cause a check engine warning and is an emission relevant component.

This reference book provides a comprehensive insight into today's diesel injection systems and electronic control. It focusses on minimizing emissions and exhaust-gas treatment.

[Diesel engine management - Bosch Mobility Solutions](#)

Bosch components such as the engine management system, fuel injection system, and AdBlue[®] injection system were modified. But thorough adjustments were also made to the turbocharger, the catalytic converters, and exhaust-gas recirculation system. During the test drives, numerous parameters were continuously measured and recorded.
