SLOGGER | MCNews.com.au

BSA actually fitted cast iron guides to the later aluminium alloy heads but we recommend the bronze as detailed above. We can of course supply the cast iron if preferred; they were fitted from engine numbers CA7SS 4024 and CA10R 5602. We also have some oversize versions of 67-1110 valve guide - 0.002 and 0.004. Pre-unit B Group Model: Years: Valve guide: Valve

Triumph/ BSA Gear Shaft Replacement

I'm replacing the valve guides in my BSA 441. The manual says to place the head in hot water (doesn't specify a temperature) to ease removal of the old guides. That sounds almost useless in terms of heat expansion compared to how hot the heads get

Valves & Guides - Draganfly Motorcycles

Before you fit the guides, coat them with moly grease and put them in plastic bags in the freezer. The punch you use should also go in the freezer. If this punch locates in the guide bore, make sure the corner radius is under-cut to avoid flaring the top of the guide. Heat the head again to 150-160 C.

1500 miles, or at least every year. 3. Exhaust valves will need lapping in every few thousand miles (not too difficult a job). Power will fall off slowly until it suddenly becomes difficult to start.

Bsa M20 Change Valve Guide

The M20 started out with hand-change gearbox, with the lever on the right, a rigid frame and girder forks. The bottom end design was common across the BSA range of singles, being used on both their M range of side valve and OHV heavy duty motorcycles and the lighter weight B series, including the famous Gold Star.
