Sclerophrys kerinyagae - Wikipedia

The common toad. European toad, or in Anglophone parts of Europe, simply the toad (*Bufo bufo*, from Latin *bufo* "toad"), is an amphibian found throughout most of Europe (with the exception of Ireland, Iceland, and some Mediterranean islands), in the western part of North Asia, and in a small portion of Northwest Africa.

Ranger's toad - Wikipedia

*Description**Edit*. True toads have in common stocky figures and short legs, which make them relatively poor jumpers. Their dry skin is thick and warty. Behind their eyes, *Bufo* species have wart -like structures, the parotoid glands. These glands distinguish the true toads from all other tailless amphibians.
