It's called C# 7.1, and its main purpose is really for us to get practice with point releases, without having too many dependencies on accompanying technology to complicate matters.

C# 7.1 is therefore a small release with just a few (but well-chosen) new

language support.

This meant that tuple
elements could only
be referenced as

Item1, Item2 and so
on. C# 7.0 introduces
language support for
tuples, which enables
semantic names for
the fields of a tuple

using new, more
efficient tuple types.
