When tubular towers were first designed in the 90s, CAB's Texas facility was the "go to manufacturer" for large diameter flanges. It was a natural evolution for CAB to take the leading role in helping to transition the market from welded steel rings to seamless forged rings with much tighter tolerances, extensive product testing and increasingly strict quality requirements.

Needle valves are available in a wide range port and orifice sizes. The connection ports can also be male or female ends. Common thread standards used are NPT (National American Pipe Thread), BSP (British Standard Pipe), or metric (ISO standards). The most commonly used needle valves range from 2 to 12 mm or 1/8" to 2".
