## Optimisation of Car Park Designs

The car park is the first building many visitors to a venue or a town/city centre come into contact with and first impressions. Although the functional requirements of multi-storey car parks have a strong influence on the building form, they should be expressed in good quality, creative design which reflects their importance in creating a good first impression.

services that well-constructed parking lots provide, businesses strive for goals while giving vehicular access to employees and customers — without the added obstacle and stress that poorly designed parking facilities tend to cause.

Car parks - SteelConstruction.info

Similarly, the design of the entrance/exit to the car park will need to be carefully considered to minimise the visual effect of the operation on the street. If multi-storey car park buildings contain parking on ground floor levels, such parking should not be provided immediately adjacent to streets with significant foot traffic or other public areas.
