Following a major flood in 1971, the community relocated the school, the health clinic, more than 150 residences, and city offices to a location 1.5 miles farther from the river, called New Town. The original town site, known as Old Town, remained partially occupied and at extreme risk from high velocity water and ballistic ice due to its location between the levee and the river.

Case study, survey, diary and interview research on FCRM ... case studies of Boulder County community resilience planning before, during, and after the 2013 flood. Three case studies focus on unincorporated Boulder County, the City of Boulder, and the towns of Lyons and Jamestown. A primary focus of the research was to document the recovery efforts within each case study; the programs, policies, or broader

This case study is about how communities and service providers in Doncaster were able to learn from flooding events in 2007 in order to develop a community flood warden scheme in flood affected areas. Community flood wardens can help to disseminate information to other residents and businesses about preparing for and responding to flooding.

Case Study - Red Snapper Managed Services
It was nevertheless questioned as to how a flood warden scheme would be funded. It was acknowledged that one person would have limited scope to act and that the efficacy of such a scheme would also depend on the level of motivation within the local community. A National Flood Warning Strategy. Page 8 of 21.
National Flood Warning Strategy

Community Flood Risk Reduction | FEMA.gov
Proper flood cushion or flood control zones are required along the Dam. The flood cushion or flood control zone is a temporary storage space for absorbing high flow for alleviating downstream flood damage. Increased public awareness is necessary to ensure an organized and calm approach to disaster management.

Case Study - Devon County Council

The study involved developing a flood risk map and response options to flood risk probabilistic forecasts based on farmers' needs for early warning. Understanding the use of probabilistic forecasts is still very limited, and operational forecasters are often skeptical about the ability of forecast recipients to understand the ensembles prediction system.
