SAN (Storage Area Network) provides systems with high-speed, lossless access to high-capacity storage devices. A VPN (Virtual Private Network) allows for information to be securely sent across a public or unsecure network, such as the Internet. Common uses of a VPN are to connect branch offices or remote users to a main office.

Before you learn Cisco Internet working, it is important to understand what a network is and the importance of networks themselves. Simply put, a network is a collection of interconnected devices (such as computers, printers, etc.). To understand the importance of networks, let us look at how things worked before networks were created. For this, [...]
