Celestron NexGuide Autoguider - 93713 - Telescopes at ...

The Off-Axis Guider from Celestron is an astrophotography accessory used to compensate for tracking errors and align the focal planes of an imaging camera and autoguider. The 12.5mm adjustable prism is capable of transmitting brighter guide stars by moving closer to the center of the telescope's focal plane (without entering the imaging camera's field of view), which is especially useful when using high-magnification optical tubes.

Celestron - Telescopes, Telescope Accessories, Outdoor and ...

The NexGuide stand-alone autoguider eliminates the need for a laptop computer in the field. Perfect for imaging with your DSLR camera.

Amazon.com: Customer reviews: Celestron NexGuide ...

The Celestron Off-Axis Guider uses a prism to intercept a small portion of the telescope's focal plane (outside the field of view of the main imaging camera) to locate a guide star. Any movement seen by the guide star will be the exact same movement seen by the imaging camera.

Celestron Off-Axis Guider 93648 B&H Photo Video

The Celestron OAG makes vertical balance in dec easy to achieve, because it keeps most of the weight of imaging and guiding cameras along close to the radial axis of the optical tube. The weight of a 9.25" SCT optical tube alone is about 20 lbs, which is within 2 or 3 lbs of the (actual) load limit of the Celestron AVX mount.

80 mm Guidescope Package | Celestron - Telescopes ...

The Orion (telescope.com) ST80 (ShortTube 80mm) at \$119 is larger, but much more appropriate than the finder that comes with the CPC800.

Orion has a guidescope kit that includes the needed parts: ST80 tube, dovetail bar, pair of guidescope tube mounting rings. You can also use the ADM V series dovetail bar and a pair of 125mm rings.

Autoguiding a Telescope for Deep Sky Astrophotography ...

Celestron even recommends using an 80mm or larger guidescope for the Nexguide. Needing a guidescope that large would be a deal-killer for many astrophotographers. The Lacerta MGEN-II standalone autoguider would be far better choice since it has a far more sensitive Sony guide chip:
