Read Free Cellular Respiration Study Guide With Answers

Study Guide | SparkNotes

Cellular Respiration is a chemical process with the following equation: $C_6H_{12}O_6 + O_2 \rightarrow H_2O + CO_2$. All organisms, including those capable of photosynthesis, go through the process of cellular respiration. The overall reaction breaks down a carbohydrate, most frequently modeled by glucose, and converts the energy stored in that molecule into the most basic cellular energy, ATP.
