The 10 Deadliest Prehistoric Mammals

Mammals. During large chunks of the Pliocene epoch, Eurasia, North America, and South America were all connected by narrow land bridges—and it wasn't all that difficult for animals to migrate between Africa and Eurasia, either.

Prehistoric Life During the Pliocene Epoch

Opossums. Opossums (order Didelphimorphia), the largest group of American marsupials, are of limited diversity in the Caribbean. The large opossum *Didelphis marsupialis* is found on Trinidad and Tobago and in the Windward Islands up to Dominica, being found on Martinique, Saint Lucia, Saint Vincent, Grenada, and the Grenadines of Carriacou, Mustique, and Bequia.

Cenozoic Era - Cenozoic life | Britannica

National Geographic specials often show a pack of fleet, deadly cheetahs preying on a herd of wildebeest. As dangerous as they are, though, these cats would be no competition for the much bigger, deadlier, yet markedly less intelligent mammals of the Cenozoic Era, which ranged from enormous rhinoceroses, pigs, hyenas, and bears to giant whales and saber-toothed tigers.

Cenozoic Mammals Of Africa

Cenozoic life was affected significantly by a major extinction event that occurred between 10,000 and 8,000 years ago. This event, which involved the sudden disappearance of many mammals after the most recent Ice Age, has been attributed to either of two factors: climatic change following the melting of the most recent Pleistocene glaciers or overkill by Paleolithic hunters.

Africa - Land | Britannica

The Old World tropics were relatively spared by the Late Pleistocene extinctions. Sub-Saharan Africa and southern Asia are the only regions that have terrestrial mammals weighing over 1000 kg today. However, there are indications of megafaunal extinction events throughout the Pleistocene, particularly in Africa two million years ago, which coincide with key stages of human evolution and ...

Mammals of the Caribbean - Wikipedia

Africa - Africa - Land: The physiography of Africa is essentially a reflection of the geologic history and geology that is described in the previous section. The continent, composed largely of a vast rigid block of ancient rocks, has geologically young mountains at its extremities in the highlands of the Atlas Mountains in the northwest and the Cape ranges in the south.
