Biology Laboratory Manual A Chapter 14 Making Karyotypes ...

Alterations in chromosome structure (Sect 11.8) Sometimes, chromosomes break, leading to 4 types of changes in chromosome structure: 1. Deletion: a portion of one chromosome is lost during cell division. That chromosome is now missing certain genes. When this chromosome is passed on to offspring the result is usually lethal due to missing genes.

Chapter 9 1. Describe How Genes, DNA Chromosomes ...

Karyotyping is the electrophoretic separation of individual chromosomes in a genome, and the karyotype obtained is a fingerprint which can be used to identify a yeast strain (Carle and Olson, 1985). However, conventional electrophoresis in an agarose gel brings about only a limited resolution of DNA molecules as large as chromosomes.
