Electromagnetism is a branch of physics involving the study of the electromagnetic force, a type of physical interaction that occurs between electrically charged particles. The electromagnetic force is carried by electromagnetic fields composed of electric fields and magnetic fields, and it is responsible for electromagnetic radiation such as light.It is one of the four fundamental ...

#### Chapter 952 - Penal Code: Offenses

A simple pendulum consists of a relatively massive object – known as the pendulum bob – hung by a string from a fixed support. When the bob is displaced from equilibrium and then released, it begins its back and forth vibration about its fixed equilibrium position. The motion is regular and repeating, an example of periodic motion. In this Lesson, the sinusoidal nature of pendulum motion is ...
