Study Flashcards On Biology Vocab and Key Concepts for Chapter 16 Evolution of Populations at Cram.com. Quickly memorize the terms, phrases and much more. Cram.com makes it easy to get the grade you want!

Chapter 16

A B: What is a gene pool? the combined genetic information of all the members of a particular pool: What is relative frequency? the number of times that an allele occurs in a gene pool compared with the number of times other alleles occur

Chapter 16: Evolution of Populations

Chapter 16 Evolution of Populations 16–1 Genes and Variation Darwin ' s original ideas can now be under-stood in genetic terms. Beginning with variation, we now know that traits are con-trolled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozy-gous for many genes.
