The immune responses of animals can be divided into innate immunity and adaptive immunity. As an overview, complete this figure indicating the divisions of both innate and adaptive immunity. See page 930 of your text for the labeled figure. Concept 43.1 In innate immunity, recognition and response rely on shared traits of pathogens 1.

### **Chapter 43**

It damages the immune system by damaging the nerves and the body wasting. This happens because your helper T cells don't work anymore, they are destroyed, which means that helper T cells can no longer activate B cells and cytotoxic T cells. Other cells are also destroyed in the immune system. In AIDS, without the immune system of activation ...
