6 - Economic transformation in the Tang-Song transition ...
A transition economy or transitional economy is an economy which is changing from a centrally planned economy to a market economy. Transition economies undergo a set of structural transformations intended to develop market-based institutions. These include economic liberalization, where prices are set by market forces rather than by a central planning organization.

The period from 750 to 1250, which scholars commonly refer to as the "Tang-Song transition," is widely recognized as the crucial watershed in the economic history of imperial China. Over the course of this period the rice economy of the Yangzi River valley supplanted the traditional heartland of the Central Plain as the Chinese economy's center of gravity.
