*The Basic Chemistry of Acids and Bases. A lot of chemistry requires you to understand the difference between acids and bases. An acid is a substance that donates an H<sup>+</sup> ion to another chemical species called a base. A base is a substance that accepts (combines with) an H<sup>+</sup> ion.. If you need to know the concentration of the H<sup>+</sup> ion in solution, you can do so by representing the H<sup>+</sup> molarity, [H<sup>+</sup>].*
