About About the Network Steering Committee Workgroups Building the Network Decisions made today regarding land use, transportation, water, economic development, and social services will have enormous long-term impacts on the future sustainability of our megapolitan region. Recognizing this, Arizona State University's Julie Ann Wrigley Global Institute of Sustainability created the ...

Project MUSE - Global Cities and Transnational Climate ...
On one hand, the growing prominence of city-networks in global climate politics suggests a fundamental transition; from the old pattern of state-centric, multilateral governance that underlies the UNFCCC to a transnational arrangement that is rooted in the active involvement of sub-state and non-state actors [21, 26, 60].

Cities, Networks, and Global Environmental Governance
The analysis showed that city networks for global environmental governance are ? rst and foremost innovative governance arrangements; albeit they also show continuities with the past. The more conventional aspects can both strengthen and weaken city networks for global environmental governance.

Global Warming: The 9 Most Vulnerable Cities
As leading global cities, New York and London were ranked first and second, respectively in terms of being information sources (or sources of learning). These two cities initiated the C40 network and hosted the 2005 (London) and 2007 (New York) C40 Mayor Summits.

Cities, Networks, and Global Environmental Governance ...
Although the previous chapter has pointed out how much networks diff er from more conventional governance strategies, the research ? ndings partially damp the enthusiasm about networks' rupture with the past, because city networks for global environmental governance equally embody continuities and do not always bring about the bene? ts that we expect.

Transnational Networks and Global Environmental Governance ...
The Cities for Climate Protection program is one of three major global transnational municipal networks aimed at reducing urban greenhouse gas emissions. Established in 1990 by the International Union of Local Authorities and the United Nations Environment Programme, one of the largest global transnational networks, the International Council for Local Environment Initiatives, presented a framework to represent local government environmental concerns internationally. The ICLEI strives to ...

The level of individual cities' integration into the international economy and transportation grid is crucial for sharing ideas of global environmental responsibility. This tendency is found both in global cities of both developing and developed countries.

About the Network - Sustainable Cities Network
The changes associated with global warming are increasing the risk of flooding in coastal cities. The rise in sea levels has been leading to saltwater intrusion and infrastructure damage from storm surges. Intensifying rainfall events elevate the risk of urban flooding. At the same time, urban populations are growing, and the value of economic investments in cities is skyrocketing.
