Estimating and Costing Definition. Estimating and Costing are closely the same things. The estimate is defined as the process of calculating or computing the various quantities and the expected expenditure to be incurred on a particular work or project. The estimate gives the probable cost of the work.

SSC-JE

Introduction to Estimating and Costing Before any engineering project is to be constructed, it is necessary to know its estimated cost to ascertain whether the required funds can be made available for its completion or not. If the funds available are more than the estimated cost of the work, the execution of the work can be started.
