Hi, I've already gone through more than half of the Cliff's AP Bio 4th edition. So far I've covered the following topics: chemistry, cells, cellular respiration,

photosynthesis, cell communication, cell division, heredity, molecular bio, and evolution. But I just read that the 3rd edition is a more appropriate study material for the DAT.

Amazon.com: CliffsNotes AP Biology, 5th Edition eBook ...

Other than the A&P chapter, I personally did not like the cellular respiration, photosynthesis, and plant chapter. Likewise, there was little to no taxonomy covered in the fourth edition (which appeared in at least 3 of my questions on my actual DAT). If you want a different perspective, try Barron's AP biology, which compliments Cliff's very well.
